Acceptance Test-Driven Development

This is one of those areas where there are a number of acronyms all of which seem to be related, including:

- Acceptance Test-Driven Development: Better Software Through Collaboration by Ken Pugh.
  - A good starting point is a short introductory video on the concept
  - Web site offers extensive resources
- Example-driven development (EDD) by Brian Marick
- Behavior-driven development (BDD) by Dan North
- Story test-driven development (SDD) by Joshua Kerievsky
- Domain-driven design (DDD) by Eric Evans

These ideas share the common goal of producing high-quality software. They aid developers and testers in understanding the customer's needs prior to implementation and customers being able to converse in their own domain language.
