Dean Leffingwell - One on One Meeting Through Icon

One on one with meeting Dean Leffingwell. Through icon.

Photos

Notes

1. Velocity impacted by project based cost accounting
2. Product companies not issue
3. Lose knowledge as temporary structure - persistent knowledge
4. Project - Temporary work for temporary resources
5. Allocate the money, but haven't spent it yet, decision about what get built is still with business
6. "Want to do this feature now"
7. Flow also impacted
8. Ability to control spend without timesheet
9. ROI is a trailing indicator. Need an implicit ROI
10. Real way to do capex policy in blog post
11. Greenfield waterfall to safe, easier than if started with existing agile team
12. Need the uniform paradigm - safe
13. Start with easy value stream
14. Remind people. Resource pool (lean idea, not agile)
15. Leadership get used to it. But problem when a group is not included
16. Break down silos - Start with "permission to plan" together - based on value flow - then couple with t-shirts
17. Mission is then clear produces different behaviors
18. Create the environment that is different
19. Something magic about putting people in a room
20. Don't think about levels. Think about how the value flows
21. Need to tease out operational vs value streams for large it shops

- 22. More than 100 people cannot work together
- 23. Look like Parthenon
- 24. Thinking tools to tease the complexity apart
- 25. C level - talk about lean
