Pithy Slogans	3
----------------------------	---

Pithy Slogans

Sometimes you just need a couple of slogans to catch on in an organization to really drive an idea. Here are some slogans that have worked in various transformations.

- Start with 'why'
- Go and see
- No demo, no numbers
- Ship it, don't WIP it
- Continuous flow; continuous dough
- Stop starting, start finishing
- Right to left, top to bottom
- Diversity trumps ability
- Focus on the problem not the people
- Don't treasure what you measure
- Treat defects as evidence of missing tests
- Pair programming is pair thinking, not pair typing
- Assume variability, preserve options
- Scope doesn't creep. Understanding grows.
- You can't scale crappy code.
- Integration points control product development
- Develop on a cadence; deliver on demand
- Lead people; manage things
- Value is rare, extreme and obvious in retrospect
- Never mistake motion for action
- Yes is easier to say. No is easier to do
- Be quick but don't hurry
- No one has to change; survival is optional
- It's better to prepare and prevent than to repair and repent
- We never have time to do it right but we always have time to do it twice
- Don't trade uncertain earliness with certain lateness
- Don't move information to authority, move authority to the information.
- Respect the ceremony
- Zero failure is a failure
- MindWIP
- Stop controlling people, start controlling value delivered
- Don't begin if you're not all in
- Disagree, then commit
- Absolutely #noabsolutes
- What, so what, now what
