# Template - Anti-Pattern or Smell

## Title

*(Short, perhaps funny, descriptive name of the anti-pattern)*

## Consumer

*(Role of person who should be able to recognize the anti-pattern when it occurs in the organization and/or should be able work the issues around the anti-pattern to improve outcomes.)*

## Description

*(A narrative description of the anti-pattern, providing context as well as an understanding of what happens. Think in terms of “what” you would see that would see.)*

## Impact

*(A description of the impact of the anti-pattern - why is this a problem, and who does it affect (team, tower, capability, etc). If the description describes the “what” of an anti-patter, then impact describes the “so what” of an anti-pattern. )*

## (Potential) Remedies

*(Approaches that have been used in the past that may offer a path forward in working the issue.)*

## Examples

*(Narrative (more than one) of the anti-pattern. In some ways the anti-pattern is could be a class of anti-pattern. This is the instance. And in some cases also describe potential solution applied in “the real*

*world". The examples should not name names unless the people directly involved are OK with using their names.)*
