Video List

On-going continuous learning  . Once you start on Agile there is no end of learning! See [Reading List](#) for books.

Current

Hopper

Completed Since November 2015

I decided to take a more disciplined approach to tracking videos I've watched as part of on-going following the approach I use for [Books](#). This list is the result of this approach:

- 2016-02-19: [Second Generation Lean Product Development Flow](#) by Don Reinertsen. As usual a very “dense” pitch with a lot of information. If you want to understand impacts of things like queuing theory, lean, and why variability should be preserved for new product development (hint: Black Scholes option pricing model) then this is the video for you.
- 2015-11-17: [10 Reasons Estimation and Planning Fails and What to Do About It](#) by Troy Magennis. Great pitch. Love the basics here, such as “If you are in the non-linear region of utilization for your project (i.e. greater than 80% utilization) then estimation will always fail”, “Sometimes you need just enough information to decide what not to do, and perhaps toss a coin for remaining options (if they really are close enough)”, “why this project won't finish on time is because of last project - and no amount of estimating is going to help” and the importance of understanding dependencies. Idea that a lot of bad things happen which increase utilization into the “non-linear” zone and so make estimating useless and forecasting difficult.
- 2015-11-12: [Introduction to Micro-services](#) by Martin Fowler. Covers definition (or rather characteristics), when they should be used, and relationship to more general SOA discussion.
- 2015-11-12: [Agile is Dead](#) - by Dave Thomas. Agile as originally intended is an adjective, not a noun.

Previously Completed

Been watching videos for a for a lot of years so this is a partial list of videos completed:

[Video](#), [Learning](#), [Improvement](#)
