What Kinds of Problems Do People See When They Go Agile? 3

What Kinds of Problems Do People See When They Go Agile?

By far the biggest problem recorded by organization attempting to become more agile is the problem of changing the culture from a traditional “waterfall” oriented shop to one focused on an agile approach. This is because, more than anything else, a move to agile represents a different way of thinking about how to be successful with software development projects. More information can be found at:

- What Are The Changes in Culture That Need To Happen with Agile?

As you do more and more of this work, you see a number of anti-patterns / smells / problems that organizations have when trying to change how they work. More information on this can be found at:

- What Kinds of Problems Do you Typically See As The Organization Transforms to Agile / Lean?
